JITTERBUG CONCRETE TAMPERS*

Our steel jitterbug features a flattened expanded metal mesh to push aggregate down just right. Our all-welded and double reinforced construction guarantees that this tamper will stay flatter and last longer.

HIGHWAY STRAIGHTEDGES*

Czar Weld's Highway Straightedges are perfect for checking flatness on large slabs. Available in steel or aluminum, our Straightedge blades are 1" x 2". Steel versions use a bolt-on rugged steel handle; aluminum versions come with either 2 or 3 standard 1-3/8" x 6' aluminum snap lock handles (add additional handles for extra reach). Blades, handles, and hardware kits may be purchased separately.

NO TOOLS REQUIRED
FOR ASSEMBLY!
